

From e-mail: "At Hyalite Lake we looked to our right at a slope (east facing?) and there was an avalanche that probably released 2 to 4 days ago. Probably 1 to 1.5 ft crown. Didn't run far.... dug up above the lake. ECTN 22 about 40 cm down. Wind slab and new snow on small facets." Photo: K. Birkeland

Advisory Region Northern Gallatin **Avalanche Details:** <u>Slab avalanche near Hyalite Lake</u> **Forecast link:** GNFAC Avalanche Forecast for Sat Jan 5, 2019 Northern Gallatin, 2019-01-05
