Aspect
N
Latitude
45.29810
Longitude
-111.52400
Notes

From email: "There was a large avalanche on the north face of Fan. It is not on the NE Face that everyone skis, but out to the west of the north [couloir](#) where there is a major ridge off the summit. North [aspect](#), estimated at over 1K ft. wide, to the ground with a deep crown. Likely triggered by [cornice](#) fall."
