FULL AVALANCHE REPORT: <https://www.mtavalanche.com/accident/21/01/11>

On January 8, 2021 a group of six skiers triggered an avalanche on The Fin on Republic Mountain outside of Cooke City. They were skinning up the slope when they felt the slope [collapse](#) and watched cracks propagate 250' upslope. Three were caught and partially buried. Skier 1 deployed his airbag, was partially buried and able to get himself free. He freed himself from the debris and began a beacon search which led him to see skier 2 who was buried head down with his airway obstructed. He was uncovered by skier 1, not breathing and unconscious. He sustained injuries, but later made it out under his own power. Skier 3 was partially buried higher in the path, sustained serious injuries to his ribs and lungs and was evacuated by helicopter. The avalanche broke 1.5' - 2' deep, 200' wide and ran 700' vertical. The average slope angle was 37 degrees. Slope angle at the crown was 33 degrees on an east [aspect](#) at 9,700' elevation. The avalanche is classified SS-ASu-R2-D2.5-O.

Number of slides
1
Number caught
3
Number buried
1
Avalanche Type
Soft slab avalanche
Trigger
Skier
Trigger Modifier
u-An unintentional release
R size
2
D size
2.5
Bed Surface
O - Old snow

Problem Type

Persistent Weak Layer

Slab Thickness

18.0 inches

Vertical Fall

700ft

Slab Width

200.00ft

Weak Layer Grain type

Faceted Crystals

Weak Layer grain size

2.00mm
