

Skier triggered cornice N of Peters Point, adjacent to Bridger Bowl boundary

BRIDGER RANGE

Bridger Range

2/27/2021

Code

SS-ACu

Latitude

45.85120

Longitude

-110.94800

Notes

From obs: "Observed a small avalanche while teaching a rec. 1 today for MSU. The light was too flat to see a crown. Based on the light wind, ski patrol obs. and our moving obs., I hypothesize that it was a dry, loose avalanche. L-N-R1-D1.5-I."

Patrol reported: "A midday report from [a skier] that he had released the Duane's [Cornice](#) (out of bounds to the north) as he travelled to the ramp had us looking for any tracks below, none were observed. It looked to step down and pull some older layers as it went through the lower pinch."

Number of slides

1

Number caught

0

Number buried

0

Avalanche Type

Soft slab avalanche

Trigger

Cornice fall triggered by human or explosive action

Trigger Modifier

u-An unintentional release

Slab Thickness units

centimeters

Single / Multiple / Red Flag

Single Avalanche

Advisory Year

[20-21](#)
