

Specimen Creek/Big Horn

Date

Wed, 03/03/2021 - 16:21

Activity

Skiing

GNFAC,

Was up Specimen Creek today, it was HOT. Seemed like everything other than north faces got wet. We found some cold NE and NW facing snow in the AM but it was sticky by the afternoon, plenty of roller balls on steep faces. On the drive back we saw a large crown on the NW face of Big Horn peak, I've attached a photo that I took right as we saw you guys drive by in the GNFAC rig haha. I don't think it was there in the morning, but I could be mistaken.
