Collapses and Whumphs on NE Aspect 8000 feet in Hyalite

Hyalite - East Fork Northern Gallatin 12/12/2021 Code AF-O Elevation 8000 Aspect NE

Latitude

45.45050

Longitude

-110.91900

Notes

From email obs: 12/12/21: "Shooting cracks and whoomphing in wind loaded areas. An approximately 15x30ft wind slab cracked along the bas of a rock band and settled at the base of P2 on high fidelity. Was triggered while traversing along the rock band to gain the second pitch, 1-2 inches of facets on the ground. Wind slab of 6-36in in the gullies."

(Second photo, believed to be from different group, sent on IG)
