Remarkably weak snowpack requires caution

Submitted by Alex Marienthal on Mon, 02/12/2024 - 17:22

In 9 years of avalanche forecasting I have not seen a snowpack so weak. When I thought the snowpack was bad in past seasons, it wasn't this bad. Almost every season we have weak, sugary <u>faceted snow</u> near the bottom of the snowpack, and at least half the time the weak snow is a problem all season. Professionals with longer careers have seen few, if any, winters with as poor <u>stability</u> as this winter.

Weak snowpack requires caution, MSA Feb 2024
